## 闸阀系列

### **GATE VALVE SERIES**

## 特点 Features

- 重量轻：本阀采用球墨铸铁制造而成，重量较传统闸阀重量减轻20%~30%，安装维修方便。
- 平底式阀座：传统的闸阀往往在通水洗管后即因外物诸如石头、水块、水泥、铁屑、杂物等淤积于阀底凹槽内，容易造成无法关闭紧密而形成漏水现象，弹性座封闸阀底部采用与水管相同的平底设计，不易造成杂物淤积，使流体畅通无阻。
- 整体包胶：阀瓣采用高品质的橡胶进行整体内、外包胶，国内一流的橡胶硫化技术使得硫化后的阀板能够保证精确几何尺寸，且橡胶与球墨铸铁闸板连接着牢靠，不易脱落及弹性记忆佳。
- 精铸阀体：阀体采用精密铸造，精确的几何尺寸使得阀体内部无需任何精加工即可保证阀门的密封性。
- 嵌入式铜螺母：铜螺母与弹性阀门采用嵌入式接合，使二者紧密结合成为一体，不因水流造成震动而产生松动或损坏现象。
- 耐腐蚀：阀体采用粉沫环氧树脂涂装，可防止阀体的腐蚀及生锈，并可用于污水系统。
- 不易碎裂：以往传统铸铁闸阀常因外物击中、碰撞或重叠而造成断裂现象。由于本阀改用球墨铸铁，此种情形可大幅度减少。
- "O"型环密封圈：由于阀体采用三道 "O" 型环密封圈密封设计，可减少开关时的摩擦阻力，大幅减少漏水现象及可以不停水施工更换密封圈。
- 有助生饮：由于阀体内部以无毒性环氧树脂涂装，闸板的内外表面均以橡胶完全包覆而不至于出现锈水或腐蚀现象，可供生饮。

- Weight light:** This valve uses the modular cast iron manufacture to become, the weight compares the traditional gate valve weight to reduce 20%~30%, the installment service is convenient.
- Flat base type valve seat:** The traditional gate valve often after passes the laundering tube namely because outside the thing such as stone, Shui Kuai, the cement, the iron filings, the sundry goods and so on silts up Yu Fade in the scoop channel, is easy to create is unable to close closely forms the water leakage phenomenon, elasticity seals the gate valve base to use with the water pipe same flat base design, is not easy to create the sundry goods to silt up, unimpededly causes the fluid to be unimpeded.
- Whole encapsulate:** The valve petal uses the high quality the rubber to carry on in the whole, lagging glue, after the domestic first-class vulcanization technology enables the curing the valve board to be able to guarantee the precise geometry size, also the rubber and the modular cast iron damper plate are connecting sturdily, is not easy to fall off and the elastic memory is good.
- Fine casts the valve body:** The valve body uses the precision casting, the precise geometry size causes the valve body interior not to need any precision work then to guarantee the valve the leak-proof quality.
- Inserts the type copper nut:** The copper nut and the elastic valve use inserts the type joint, causes a two in close integration with into body, because the water mobile does not create the vibration to produce becomes less crowded or the damage phenomenon.
- Anti-corrosive:** The valve body uses the powder froth epoxy resin painting, may prevent the valve body the corrosion and rusts, and may use in the sewage system.
- Is not easy to disrupt:** Former traditional cast iron gate valve Chang Yinwai hits, the collision or overlaps creates the break phenomenon. Because this valve changes to the modular cast iron, this kind of situation may large scale reduce.
- Three "O" link seal packing collar:** When the valve body uses three "O" the link seal packing collar seal design, may reduce the switch the friction drag, largely reduces the water leakage phenomenon and may not cut off the water supply the construction replacement seal packing collar.
- Is helpful to live drinks:** As a result of the valve body interior by the non-toxic epoxy resin painting, the damper plate inside and outside surface but as for does not appear the rust water or the corrosion phenomenon by the rubber complete gable, may supply to live drinks.

## 简介 Brief

暗杆软密封闸阀，利用闸阀整体包胶产生变形补偿作用达到良好的密封效果，克服了一般闸阀密封不良、漏水和生锈的现象，更有效有节约安装空间。可广泛用于自来水、污水、建筑、石油、化工、食品、医药、轻纺、电力、船舶、冶金、能源系统等流体管线上作为调节和截流装置使用。

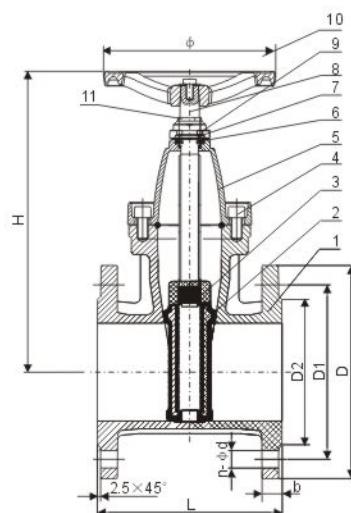

Non-rising resilient gate valve, gate valve as a whole package glue to produce the phenomenon of deformation compensation effect to achieve a good sealing effect, to overcome the general valve seal bad, water leakage and rust, the more effectively to save installation space. Can be widely used as the regulation and closure devices for water, sewage, construction, petroleum, chemical, food, pharmaceutical, textile, electric power, shipbuilding, metallurgy, energy systems and other fluid pipeline.

## 主要零部件材料 Material of main parts

| 序号No | 名称Name           | 材质Material                            |

**简介 Brief**

明杆橡胶闸阀除具有暗杆橡胶闸阀的优点之外，并可以较直观的显示阀门开度。启闭迅速可靠，故常应用于自来水、污水、建筑、石油、化工、食品、医药、轻纺、电力、冶金、能源系统等流体管线上作为通断装置使用，一般安装于距地面以上位置。

Rising stem rubber gate valve has the advantage of the hidden rod rubber gate valve, and can display the valve opening degree relatively directly. Open and close quickly and reliably, so often used in water, sewage, construction, petroleum, chemical industry, food, pharmaceutical, textile, electric power, metallurgy, energy systems, fluid lines as on-off device, usually installed at a distance above ground position.

**Z41X**

**简介 Brief**

大口径闸阀采用最优质的球墨铸铁或碳钢铸造而成，具有强度高、重量轻，几何尺寸精确的特点，闸板具有互换的功能，加装螺旋伞齿轮省力机构，一人可非常轻松自如地开关，也可根据用户的要求加装开闭指示柱，或电动、气动系统、市政建设及矿山、冶金、电厂等行业。

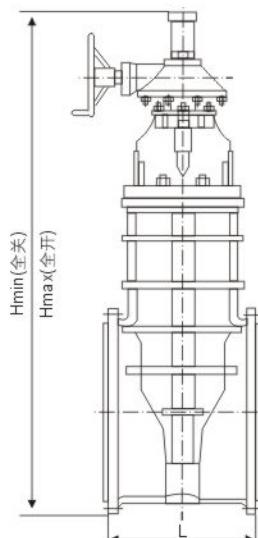

Large diameter gate valve using the highest quality ductile iron or carbon steel casting, high strength, light weight, precise geometric dimensions, ram interchangeable features, the installation of spiral bevel gear and effort institutions, one can very easily the ground switch can also be based on the user's requirements, installation of opening and closing directions column, or electric, pneumatic systems, municipal construction and mining, metallurgy, power plants and other industries.

**简介 Brief**

锁闭式橡胶闸阀是在原橡胶闸阀基础上加装磁性专用锁，适用于供热、供水等收费管网，可随时对用户进行停水、停热，防止因用户故意拖欠费用所造成不必要的损失。在重要管网系统或重要设备上安装此阀，可避免非操作人员误开或误关阀门，造成事故的发生。可用于城镇给排水管网、小区供水管理、小区供暖管理、园林绿化、油品等行业。

Locking type rubber gate valve is on the basis of the original rubber valve installed magnetic special lock, suitable for heating, water supply and charging network, may at any time to the user for suspension of water supply, heating is stopped to prevent unnecessary losses caused due to the deliberate arrears of the cost of the user. Install the valve on the important pipe network system or important equipment, which can avoid the mistake of opening or closing the valve, causing the accident. Can be used for urban water supply and drainage pipe network, residential water management, district heating management, landscaping, oil and other industries.

## 简介 Brief

信号闸阀常应用于自动喷水消防管路系统，来临界控供水管路，可以远地指示阀门开度。升杆式闸阀及附开度指示闸阀也经常应用于消防系统，如果闸阀安装位置离地面较高时，一般使用升杆闸阀，可以明显指示闸阀开度，若安装位置较低，则需用付开度指示闸阀。

Signal gate valve often used in automatic sprinkler fire piping system to the critical control and water supply pipes, remote indication of valve opening. Rising Stem Gate Valve and attached to the opening direction gate valve are often used in fire protection system, if the gate valve installation location away from the high ground, usually lever gate valve, it is clear indication the valve opening, if the installation position of the lower. Gate valve is required to pay to open instructions.

## 简介 Brief

沟槽暗杆闸阀是沟槽闸阀的一种，它具有开关轻巧、密封可靠、弹性记忆佳及使用寿命长等显著优点。沟槽闸阀重量轻，本体采用球墨铸铁制成，重量较传统闸阀重量减轻约20%-30%，安装维修方便。广泛应用于自来水、污水、市政建筑等流体管线上作为通断设备使用。

Grooved non-rising stem gate valve is a trench gate. It has a light switch, reliable sealing, good elastic memory and long service life and other significant advantages. Trench gate light weight, body made of ductile iron, lighter in weight than conventional valve about 20%-30%, easy installation and maintenance. Widely used in water, sewage, municipal buildings and other fluid pipelines as the use of off equipment.

## 特点 Features

- 1、结构紧凑、设计合理、阀门刚性好，通道流畅流阻系数小。
  - 2、密封面采用不锈钢和硬质合金，使用寿命长。
  - 3、采用柔性石墨填料、密封可靠、操作轻便灵活。
  - 4、驱动方式分手动、电动、气动、齿轮传动、结构型式：弹性楔式单闸板、刚性楔式单闸板和双闸板型式。
  - 5、广泛适用于石油化工、火力发电厂等油品、水蒸汽管路上作接通或截断管路中介质的启闭装置。
1. Compact structure, rational design of rigid valve, and channel fluid flow resistance coefficient.  
 2. Sealing surface using stainless steel and cemented, long service life.  
 3. The use of flexible graphite packing, sealing reliable, flexible and lightweight.  
 4. Sub-hand drive, electric, pneumatic, gear transmission, structure type: a single flexible wedge gate, Rigid wedge and the single-gate type double gate board.  
 5. Widely used in petrochemical industry, coal-fired power plants such as oil, water, steam pipe on the road for access or cut-off Line in the gate dielectric devices.

## 产品简介 Product introduction

法兰闸阀具有结构合理，启闭灵活，密封性能可靠，造型美观，耐磨，耐高温，耐腐蚀，使用寿命长等特点，适用于石油、化工、制药、化肥、电力行业等各种工矿的管路上，作切断或接通管路用。

Flange gate valve has the advantages of reasonable structure, flexible opening and closing, reliable sealing performance, handsome in appearance, wear resistance, high temperature resistance, corrosion resistance, long life and other characteristics for in petroleum, chemical, pharmaceutical, chemical fertilizer, power industry and other various mining pipe, cut off or connected to the pipeline.

## 特点和用途 Features and use

1. 该系列规范、阀门适用于污水处理、化学工业、造纸制浆业及矿业洗煤业，对流通介质为液体的悬浮液、浆液等管线中起到截止及开通作用。
2. 阀门采用单侧强制密封，不但密封可靠，而且可排除沉积达到密封要求。阀体可采用铸铁、碳钢、不锈钢及聚四氟乙烯等材料，以满足耐蚀、抗磨等不同要求。
3. 此结构长度短、重量轻。安装及维修都很方便。
4. 适用温度：-10℃~120℃
5. 公称压力(0.25MPa)、0.6MPa、1.0MPa。

PZ73X
